## Basic to Advanced-Level Games 1-32

Everyone enjoys playing games—especially the competitive board games that have endured for many hundreds of years. Why not apply the rules of classic *Lotto* and *Bingo* to teaching or learning the basic skills required for reading and vocabulary success? In place of or in addition to traditional materials for learning phonics (the relationships between letters and the sounds they represent), elementary through adult learners can use these innovative, effective materials to acquire or strengthen (and speed up) their word-level reading and spelling abilities. And because they engage and motivate learners, the preparation and follow-up activities for *Phonics Bingo Sound/Spelling Board Games* will enhance language learning too.

**W**hat is a phonicspelling *Bingo Sound/Spelling Picture Board Game*?

All *Basic-Level Phonics Bingo Sound/Spelling Board Games* offer pictures for “reading” practice, words whose names include basic contrasts in either their vowel or consonant sounds. There are ten different *Bingo Boards A-J* for each game, in which the various items appear in different arrangements. There are 32 distinct phonicspelling *Bingo Games* available from *Authors & Editors*, eight different games at each of four language-learning-levels. Half of the games at each level contrast vowel sounds and spellings. The other four focus on consonants.
